

Central Bank Watching

Infos pratiques

- > ECTS : 4.5
- > Nombre d'heures : 24.0
- > Langue(s) d'enseignement : Français, Anglais
- > Niveau d'étude : BAC +5
- > Période de l'année : Enseignement dixième semestre
- > Méthodes d'enseignement : En présence
- > Forme d'enseignement : Cours magistral
- > Composante : Sciences économiques, gestion, mathématiques et informatique
- > Code ELP : 4EoBMCBI
- > En savoir plus : <https://sites.google.com/view/mastergda>

Présentation

The course is a combination of seminars and lectures. The first session is devoted to a general presentation of the course/seminar. The second and third sessions are devoted to a lecture about central banking and monetary policy as well as central bank presentations by students (design, objective, history, recent behaviour, etc.). Students have to pick a central bank (US, EMU, England, Japan, BRICS, North Europe, Swiss, etc.) that they will study and about which they will become the class expert.

Objectifs

This course is about Central Banks, their activities, their mandate, their policy role, and their relationships with governments and other public authorities. For a few decades, there was broad consensus about Central Banks missions, instruments and institutional framework. Monetary policy was well defined in its theory, its strategy, objectives and instruments. Central banking is now going through a transition. The financial crisis has forced Central

Banks into unprecedented interventions both in nature and magnitude. It has brought back their historical responsibility as guardians of financial stability. It has exposed them to criticism and challenges to their expertise and questions to their independence. The purpose of this course is to provide an understanding of the purposes and functions of central banks and the challenges they confront.

Évaluation

Évaluation durant le cours sur des articles de recherche

Pré-requis nécessaires

Money, banking and finance

Compétences visées

Central bank watching
